KC'S UPTOWN THEATER BOLDLY HOSTS NOTED RESEARCH SCIENTIST AND AUTHOR "SCIENCE APPLIED TO THE WORLD TRADE CENTER COLLAPSE"

Kansas City, MO -- 22 August 2006 -- Nearing the 5th anniversary of the horrific attacks on America, an acclaimed research scientist and 9-11 author is coming to the Kansas City area to present *Science Applied to the World Trade Center Collapse*.

On September 1 and 2, independent researcher Jim Hoffman will discuss the official investigations of 9/11, including The Official 9-11 Commission Report, NIST and FEMA Reports, with specific focus on physical evidence issues.

Hoffman is a research scientist, software engineer, mathematician and inventor. The creator of websites Science911.org, 911Research.com, WTC7.net, 911Review.com, and co-author of *Waking Up from Our Nightmare*, Hoffman is now available for interviews regarding upcoming appearances in the Kansas City area.

Invitations to *Science Applied to The World Trade Center Collapse* are also being formally extended to citizen's representatives and supporters of the official 9/11 investigations.

A recent Scripps Howard national poll concluded that one in three Americans now suspect 9-11 government conspiracy.

Thanks to the prestigious Uptown Theater, Kansas City has a unique opportunity to see a noted independent 9-11 author as well as to gently challenge and ask questions regarding this critical national issue and Hoffman's own extensive research analysis and conclusions.

Current public presentation events:

THE UPTOWN THEATER 3700 Broadway, Kansas City
Saturday September 2: 1:00-2:30 p.m. AND 7-9 p.m.
